

# PLUMBER'S BACKFLOW ASSESSMENT FORM

## Assessment of Backflow Protection Required at

.....

*This form is to be completed by a licenced plumbing contractor with **endorsement in backflow prevention** and returned to North East Region Water Corporation.*

I, .....

a licenced plumber, carried out an inspection on the ..... / ..... / .....

of the property owned by .....

situated at .....

The backflow hazards present have been assessed according to Section 4 of AS 3500.1:2003 and I hereby certify that:

- Containment protection is NOT required because:
  - There is no hazard present.
  - An existing hazard has been removed.
  - An alternative water supply exists, but there is no potential for cross connection to the potable supply. NERWA has determined that a minimum of 18.0 meters separation between the alternative supply and the potable supply is acceptable.
  - Other. (Please specify) .....

.....

- Containment protection is required and I recommend that an appropriate approved backflow prevention device should be installed.

**Please Note: The Notes for Clause 4.4.1 of AS 3500 state "In assessing a potential backflow condition, consideration must be given to the complexity of piping, the probability of piping change, and negligent or incorrect use of equipment resulting in a backflow condition."**
